2015 CAS -TWAS Symposium

2015.7.23-25

Green Technology for Sustainable Development

Aims and Objectives

The symposium is designed to provide a comprehensive overview of the latest research developments and technology innovations in green technology for sustainable development, especially the developing countries due to the energy crisis and environmental pollution issue. Providing a platform of academic and business communication for the developing countries, one of the main targets of this conference is to bring together academic researchers in different fields to discuss about the possibility of integration new technologies.

In addition, we hope this symposium can build up the communications among the engineering scientists, practitioners, policy makers from the developing countries as well as the developed countries, focusing on the green technologies considering their sustainability, which have tremendous impacts on energy, resources and environmental sciences.

Topics

- Green Solvent and Green Chemistry
- Catalytic Reaction and Process Engineering
- Biotechnology and Bioprocess
- Nanotechnology and Materials
- Renewable Energy and Green Technology
- Environmental Pollution Control
- The Other Related Topics

Call For Paper

Abstracts of either fundamental or applied researches that fall within the topical areas will be welcomed. Participants wishing to present their work are invited to submit through online submission (www.2015greentech.com) or email (2015greentech@ipe.ac.cn).

Important dates

Jun 15, 2015	Abstracts due
Jun 20, 2015	Notification of presentation form
July 1, 2015	Deadline for Early Registration
July 23-25 2015	2015 CAS-TWAS symposium

Visa application

For those who need to get visa from China, please contact us by email: 2015greentech@ipe.ac.cn Please include: full name, date of birth, nationality, passport No., date of entry, duration of stay, place of visa application and the other required information. We will provide an invitation letter or other documents for your visa application.
